NOTE:
When safety hazards are encountered that can not be easily avoided they must be IMMEDIATELY reported to your Supervisor, and to your Business Representative if necessary.

"We came to this trade to have a better life not a shorter one."

Keep safety in mind at work and play.
Be there for your family!

This daughter lost her father, an elevator constructor, a few vacations ago. Her children never met their Grandfather.

WHY?
In his haste to meet his family at an area lake campground for their first summer outing his vehicle left the road and he lost his life. Because of the excitement and rushing to be with his family he never got the opportunity to meet, know, or play with his grandchildren.

Safety is 24/7.
Have a safe summer. Take the time to be safe. Enjoy your family.
